

VIDUR SATIJA

STUDENT

Computer Science caught my eye when I was a child. I've been learning and implementing since I was in 3rd grade when I learnt basic HTML.

I want to create a huge impact by being the best I can be and contributing to this world. I want to change lives.

I'm fascinated by the human mind. I'm very curious about learning how it works and how to implement it artificially. Neural Networks, Psychology, and Philosophy are my areas of interest and I hope one day I'm able to help in transforming the world.

"Work hard, Play hard"
